SYED ASHRAF S N

Software Developer
+91 7418880527 | Gmail | LinkedIn | GitHub | Portfolio | Royapuram, Chennai.

PROFESSIONAL SUMMARY

Recent B.Sc Computer Science graduate with two internships and two deployed AI-powered applications covering full-stack development, REST API design, and ML/NLP model development. Proficient in Java, Python, Flask, React, scikit-learn, Hugging Face Transformers, and Git. Experienced building end-to-end systems from model training through to production deployment.

INTERNSHIPS

Software Development Intern – IT Wing — *Jan 2026 – Feb 2026*

Chennai Metro Rail Limited | Nandanam, Chennai | Code

- Designed and developed a staff management dashboard for the IT Wing serving 200+ employees, reducing manual data access time by ~30% through streamlined UI and optimized data retrieval.
- Implemented secure authentication with Role-Based Access Control (RBAC), improving access security by ~40% and enforcing department level data segregation across the organization.
- Optimized backend validation logic and input sanitization, reducing unauthorized access attempts and data entry errors by ~25%.

Tech Stack: *Python, Flask, Flask-CORS, SQL, HTML5, CSS3*

Project Lead - Machine Learning & Deep Learning Intern — *June 2025 – July 2025*

G - TEC Computer Education | Anna Nagar, Chennai | Code

- Integrated an interactive Big Five personality assessment with career prediction logic, combining behavioral traits and user-profile attributes to improve the relevance of recommended career paths.
- Built a predictive model using Random Forest and advanced ML models, achieved optimal accuracy by fine-tuning the models.

Tech Stack: *Python, Flask, Scikit-learn (Random Forest), Job lib, HTML5, CSS3, JavaScript, CSV-based Datasets*

TECHNICAL SKILLS

- **Languages:** Python | JavaScript | TypeScript | Java
- **Frontend:** React 18 | HTML5 | CSS3
- **Backend:** Flask | Flask-CORS | REST API Design | Node.js
- **Databases:** MySQL | PostgreSQL
- **ML & Data:** scikit-learn | Hugging Face Transformers | TensorFlow/Keras | PyTorch | pandas | NumPy | NLP
- **Cloud:** AWS (EC2 | S3 | IAM | Lambda | RDS)
- **Tools:** Git | GitHub | Render | Vercel | VS Code | Linux | GitHub Copilot | ChatGPT | Claude Code
- **Concepts:** OOP | Data Structures & Algorithms | SDLC

PROJECTS

Hate Shield AI - Code | Live

- Built a full-stack AI content moderation platform with a Flask REST API backend and multi-page HTML/JS frontend, Supports text, image, and audience sentiment analysis across a 4-class toxicity detection system (hate speech, offensive, toxic, safe).
- Trained a custom hate speech classifier using scikit-learn with confidence scoring; integrated Hugging Face Transformers pipeline for multi-label emotion detection (anger, fear, joy, sadness, disgust) on user-submitted content.

Tech Stack: *Python, Flask, Flask-CORS, scikit-learn, Joblib, Pillow, Transformers, PyTorch, HTML5, CSS3, JavaScript, HTTP Server*

Career Path Predictor - Code | Live

- Engineered a multi-model ML pipeline in Python combining MBTI-style personality assessment and work values datasets, trained scikit-learn classifiers to generate ranked career path recommendations with confidence scores.
- Built an interactive Flask web interface serving prediction results with downloadable PDF career reports generated per user session.

Tech Stack: *Python, Flask, scikit-learn, NumPy, pandas, HTML5, CSS3, JavaScript, Bootstrap, CSV, FPDF, BeautifulSoup*

CERTIFICATIONS

- Anthropic - Al Fluency Framework & Foundations
- Amazon Web Services (AWS) – AWS Cloud Practitioner Essentials
- Cisco - Data Science Essentials with Python

EDUCATION

B.Sc. in Computer Science — ***2023-2026***

St. Thomas College of Arts and Science, Chennai | **CGPA:** 8.44 / 10.0
