SYED ASHRAF S N

AI/ML DEVELOPER

Gmail | LinkedIn | GitHub

Royapuram, Chennai.

Professional Summary

Final year B.Sc Computer Science student specializing in AI/ML development. Built production-grade NLP systems for content moderation using Hugging Face Transformers and scikit-learn. Interned at Chennai Metro Rail Limited delivering enterprise dashboards with RBAC for 200+ IT Wing staff.

Skills

- **AI/ML:** Python, scikit-learn, Hugging Face Transformers, pandas, NumPy, NLP, ML model training & deployment
- **Web Dev:** React, Flask, REST APIs, HTML, CSS, JavaScript
- **Databases:** MySQL
- **Tools & Platforms:** Git, GitHub, MS Office, VS Code
- **Soft Skills:** Team Leadership, Project Management, Adaptability

Projects

Hate Shield AI

SyedAshraf49/HateSheildAI-V3

- Built a full-stack AI content moderation platform with a Flask REST API backend and multi-page HTML/JS frontend; supports text, image, and audience sentiment analysis across a 4-class toxicity detection system (hate speech, offensive, toxic, safe).
- Trained a custom hate speech classifier using scikit-learn with confidence scoring; integrated Hugging Face Transformers pipeline for multi-label emotion detection (anger, fear, joy, sadness, disgust) on user-submitted content.

Career Path Predictor

SyedAshraf49/Carrer-Path-Predictor-FI

- Engineered a multi-model ML pipeline in Python combining MBTI-style personality assessment and work values datasets; trained scikit-learn classifiers to generate ranked career path recommendations with confidence scores.
- Built an interactive Flask web interface serving prediction results with downloadable PDF career reports generated per user session.

Internships

Software Development Intern – IT Wing — Jan - 2026

Chennai Metro Rail Limited | Nandanam, Chennai

- Designed and developed a staff management dashboard for the IT Wing serving 200+ employees, reducing manual data access time by ~30% through streamlined UI and optimized data retrieval.
- Implemented secure authentication with Role-Based Access Control (RBAC), improving access security by ~40% and enforcing department-level data segregation across the organization.
- Optimized backend validation logic and input sanitization, reducing unauthorized access attempts and data entry errors by ~25%.
- Gained hands-on exposure to enterprise-grade government IT infrastructure, security compliance protocols, and production deployment standards.

Education

B.Sc in Computer Science — 2023-2026

St. Thomas College of Arts and Science (affiliated with University of Madras)
– Koyambedu, Chennai.
